We believe price transparency goes beyond government compliance and gives community hospitals and medical practices the opportunity to improve the patient experience and build trust within the communities they serve.

Our price transparency solution will give your consumers the ability to easily identify costs by simply searching procedures, products and drugs. We even bundle associated items so that you remain transparent and your customers have clarity.

We've got you covered:

- We ensure you meet the executive order for price transparency.
- We deliver a modern design and user experience branded to your organization.
- We help you increase patient volume, satisfaction and loyalty.

Industry research shows that the majority of hospitals are not compliant with the price transparency executive order. As the order is now being enforced, the fines have been \$100k to over \$1M. SlicedHealth provides confidence that enforcement of the order doesn't create fines in your hospital's future.
