

Business Intelligence

Your data-driven virtual analytics team.

We bring your data to life with dynamic automated internal reporting, so that you can easily view and track the financial health of your community hospital or group practice.

Our AI-driven solution delivers on-demand insights, allowing you to gain control over your financials and become a better forecaster, budgeter and strategic leader. Essentially, we're your virtual financial analytics team.

We've got you covered:

- ✓ Easily identify trends & outliers
- ✓ Observe denials proactively
- ✓ Track claims data by payer, provider & diagnosis
- ✓ See profitability by payer, provider & diagnosis
- ✓ Target newly identified patient populations
- ✓ Focus your attention on the tasks creating the highest return

CFO

SlicedHealth has helped us accelerate our cashflow by giving us immediate insights into our billing trends, payer behavior, and patient payments.

Get real-time actionable insights on demand.

1.

Generate the claims data you value most

2.

Uncover areas needing special attention

3.

Identify claim denial opportunities

✓ Payment & Adjustment Analysis

✓ Claims Analysis

✓ Charges Analysis

✓ Payer Analysis

✓ Denials Analysis

✓ Market Analysis

Security

We are HIPAA secure, using only compliant 3rd party services, so all data is encrypted at rest and in transit. Strict security requirements are maintained at each layer in the SlicedHealth® platform architecture (UI, API, DB) as from end-to-end, each tenant has access to only their data.

Implementation

From kick-off to your using the solution, our implementation typically takes just weeks. You read that right: weeks, not months, of implementation time. We help you see immediate results compared with waiting half a year to implement a competitive solution.
