

Contract Variance Analysis

Better technology puts the power of data in your hands.

Your job is to provide the highest quality care for your patients. Our job is to make sure you're correctly paid for that care. As part of our strategy to turn data into action, we uncover hidden information that your insurance company would rather you not find.

Our contract variance analysis solution is affordable, and helps you quickly identify when payments fall short of the contractual obligations of your payers. We provide targeted worklists to aid you in collecting the correct reimbursement for your services. Our technology helps put the leverage of payer negotiations in your hands and tracks payer performance.

The screenshot displays the SlicedHealth Claims Analysis interface. It features a summary section with four key metrics: Total Charges (\$1,138,094.05), Estimated Payments (\$555,427.34), Actual Payments (\$450,269.57), and Total Variances (\$105,157.77). Below this is a search bar and a table of claims. The table includes columns for Claim Number, Payer Name, Contract Name, Service Date, Remit Date, Visit, Charged Amount, Expected Pay, Actual Pay, Variance, Denial, and Actions. The table contains several rows of data, including claims from BLU CROSS PPO and United HHC.

Security

We are HIPAA secure, using only compliant 3rd party services, so all data is encrypted at rest and in transit. Strict security requirements are maintained at each layer in the SlicedHealth® platform architecture (UI, API, DB) as from end-to-end, each tenant has access to only their data.

By understanding the performance of your payers from time to payment, error rates, and denials, you can better negotiate a plan that best fits your organization. Modeling of newly proposed plans gives you the information needed to understand the financial impact of any proposed changes.

Implementation

From kick-off to your using the solution, our implementation typically takes just weeks. You read that right: weeks, not months, of implementation time. We help you see immediate results compared with waiting half a year to implement a competitive solution.
